TEST REPORT

Date: 15/08/2025 **Patient ID: 112516034** **Mob:8864808090**
Name: Mr. ANSHUL **Age: 19 Yrs** **Gender: Male**
ID / PW : 112516034 / 1EEE0AC0 **D.O.B.:**
Refd by:SNMC, AGRA

Test	Value	Biological Ref Interval	Unit

HLA B-27 REAL TIME PCR, QUALITATIVE

TYPE OF SPECIMEN	BLOOD
HLA-B27 PCR, QUALITATIVE	NEGATIVE

Method : REAL TIME PCR

Index	Remarks
Positive	Both HLA-27 & IC detected
Negative	Both HLA-27 Not Detected & IC Passed
Invalid	No Amplification in both

NOTE :

1. Test Preformed On EDTA/ACD Whole Blood
2. In cases of HLA-B27 negative spondyloarthy, further testing recommended is HLA - C*06 (positive in psoriatic arthritis)and HLA-B*07 (positive in juvenile and undifferentiated spondyloarthropathy).

COMMENTS : Certain inflammatory and non-inflammatory diseases are associated with the inheritance of HLA alleles. Ankylosing spondylitis and several postinfectious arthropathies are associated with the presence of HLA-B27. Individuals who inherit this class I allele have a 90 fold greater chance of developing the disease as compared to those who do not carry HLA-B27. It is postulated that the mechanism underlying this association most probably influences T cell response.

Uses

DISEASE	STRENGTH OF ASSOCIATION
Ankylosing spondylitis	+ + + +
Reiter's syndrome	+ + + +
Reactive arthritis (Yersinia, Salmonella, shigella & chlamydia)	+ + +
Acute anterior uveitis	+ + +
Psoriatic spondylitis	+ + +

Printed by: SNMC
If Results Marked with HC=High Critical & LC=Low Critical Results.
Test Requested: COLLECTION CHARGE,HLA B-27 PCR
